# Mines and Prospects--Furnaces and Mills

# Much Impressed by Mineral Wealth

Big Berlin Mining Operator Will Scek a Field of Investment in Utah.

"Utah seems to offer more in the way of inducements to the mining investor than any other country I have ever visited," declared Herr Martin Becker of Berlin, a mine owner, expert and operator, who has large interests in the mines of Australia. Herr Becker, who continued his journey to Australia yesterday, has spent several days in Salt Lake, discussing with mining men the mineral resources of Utah. He says that the impressions he has received during his brief visit lead him to the conclusion that, as a producer

of copper and silver, this State will long continue to hold a leading place.

"The scale upon which the Utah Copper company is conducting operations is an example of what more men with capital ought to do in this Western region, for there are many opportunities of this character which have not yet been taken advantage of," asserted this expert, who has not a study of every great maining countered to the control of the cont

vantage of," asserted this expert, who has made a study of every great mining country of the world.

"When I return from my trip to Australia I will be prepared to stay here long enough to make a detailed inspection of several Utan propositions that have been placed before me, and if the investigation results as favorably as I now have reason to hope. I will interest my Berlin and Leipsic associates and take up the work of development."

#### RICHES OF GOLDFIELD.

#### Ore Worth \$1000 a Sack Is Coming From the Jumbo Claim.

Marvelous ere is still being extracted from the drift on the 200 level of the Bowes-Kernick lease on the Jumbo, says the Goldfield News. That the rich ore body struck two weeks ago is holding out is beyond question. Specimens of the rock show nimest half gold, and it is stated that fifteen sacks of rock which is worth 1000 a sack have been taken out. It is too rich to ship and is said to be kept under guard at the headquarters of the lease

owners.

The shaft is to be sunk to a depth of 256 feet and this work has been commenced. If the rich are body above is found at this level, of which there is no reasonable doubt, there will be an amount in sight and of a value to stagger the imagination.

imagination.
Shipping from the Jumbo was resumed this week, the Bowes-Kernick lease sending out about 300 sacks. There are 60.0

ing out about 600 sacks. There are 600 sacks still piled up.

Three bundred sacks from the Vermilyen lease were sent out teday and now that the teams are available the accumulated Jumbo are will soon be 601 the way to the smelters.

The Gardner, Oddie & Duffield lease on the Kendail claim of the Standstorm group continues to be one of the wonders of the Goldfield district. It is entitled to be classed as a wonder from the fact that within two weeks of operation a shipment of \$10,000 worth of ore is in readiness to be sent to the smelters. The shipment will be made tomorrow and J. R. Duffield will go out with it. It will comprise fourteen tons and its value is conservatively stated to be \$150 per ton. This ore is the screenings from the loose dirt shoveled up from the surface, mention of which was made last week.

## The Metal Market.

Ore and bullion settlements yesterday amounted to \$72,800. McCornick & Co reporting them as follows: American bullion, \$33,900 gold, silver, lead and copper ores, \$38,900. The metal market showed no change, silver ruling at \$71\forall cents an ounce; copper at 12 cents per pound, and lead in ores at \$3.50 per 100 pounds.

## Better Feeling in Boston.

Special to The Tribune. Special to The Tribune.

BOSTON, Mass, Sept. 23.—There was a little better feeling in the local market today and some issues were put on a better level. Traders were inclined to look for a better market and bid prices up. Commission house business followed this little burst of activity, but there was but little stock found offering at market prices, and they railled quite early, closing strong. Hornblower & Weeks, brokers, 33 State street, Boston, and 16 Wall etreet. New York, furnish the following quotations:

#### IMPROVEMENT ON 'CHANGE.

#### Market Shows Somewhat Better Tone and More Stocks Are Active.

There was a better tone to the stock market yesterday, the totals of the trading on change slightly exceeding \$500. More of the stocks moved and the prices held up under light sales. Daly West handed seventy shares over the counter at \$14.25, but was not offered at less than \$15 during the afternoon session. For \$1 Grand Central released 20 in the morning and the stock was in demand at that figure, but no more would come out. May Day was again active, but a little weak, the two calls showing the transfer of \$30 shares at from 7% down to 7. Sacramento brought 15 cents in the morning, but later declined to 14½, while Star Con. registered a gain of one point, selling two 500 lots at 14½ and 14½.

New York, hovering around 3 cents, was dealt in to the extent of 16,400 shares and one lot of Little Chief was taken at 1½. The open board trading of the final call injected some life into the Tonopah stocks, 200 Jumbo going at 34 and 83, with Montana-Tonopah selling 500 at \$1.99 and \$1.87½.

The day closed with the transfer of 25.-20 shares, for which the purchaser checked out \$512.62, with quotations and segregated sales as they follow. There was a better tone to the stock

# **Expert Reports** on Sheba Wealth

Dr. J. E. Talmage Finds Promise of Rich Returns From Humbollt,

Nev., Mine.

Hyldencing the great wealth that the Sheba of Humboldt county, Nev., and the contiguous mining claims afford, the expert report of Dr. J. E. Talmage, professor of geology in the University

of Utah, affords additional evidence. Dr. Talmage's report, which is now in the hands of the printer and will soon be published, treats the subject exhaustively, and was compiled during an extended stay in the district.

Of the region in general Dr. Taimage says: The fissure filling fillings or vein stuffs carry valuable minerals, visible to the naked eye, even on surface exposure in places. The principal min-erals of value in the order of their

abundance from lesser to greater are: The antimonial sulphides of silver, ruby silver, galena and argentite. Speaking of the formation, the report says: "Ore occurs not alone in veins within the fissures, but also in the sedimentary beds. At the intersection of main fissures and cross-fissures ore bodies appear in places and ore is found at the contact between eruptive rock and bedded deposits." Speaking of the Sheba claims in par-

ticular, Dr. Taimage describes the "old stope" or "big chamber," which has already yielded a vast amount of wealth, and recommends a thorough sampling of the walls and floor of this cavern. He says: "The country rock is literally woven by off-shoot veins of unmin-cralized quartz, many of which show silver minerals in quantity. The wall rock, carefully separated from any vestige of vein quartz, carries good values, and I consider it possible that a general treatment of the walls and floor in the big chamber would furnish

paying mineral for mill treatment."

Dr. Talmage recommends the further exploration of "Georges" tunnel" and "Dead Man's tunnel," and advises the exploration of the untouched ground between the second open cut and the Alex stope, which shows the vein well charged with valuable minerals.

Of conditions in the Sheba shaft, he reports the vein as "strong, persistent well mineralized," showing p widening of the vein with depth, with a probable average below the fifty-foot

probable average below the fifty-foot level exceeding eight feet.

Referring to the Sheba new tunnel, it is said: "At about \$25 feet from the portal a larger body of quartz le encountered. This is cut by the tunnel a distance of forty-three feet, the actual thickness of the vein is approximately twenty-eight feet. I consider the new tunnel well placed with sider the new tunnel well placed, with a great area of virgin ground accessible by drifts into almost surely the same quartz vein as proved so productive in

early days.

"Present conditions amply demonstrate the great value of this property. The extensive work of former days" has revealed the position of the Sheba vein, with a close approach to certainty, and the new work is wisely planned and well executed."

The report speaks in equally favorable terms of the De Soto and the Man-

terms of the De Soto and the Mammoth, and in conclusion, says: "The mines promise to yield to skillful direction wealth equal to if not far beyond that already realized."

## WILSON MESA FLOAT FOUND.

#### Source Discovered Near Apex of Gold Hill Mountain in Blowout.

Special to The Tribune. BASIN, La Sai Mountains, Sept. 22.-The source of the rich gold float found on Wilson mesa has been discovered. The discovery was made a few days ago by Iowa J. Smith and Charles Saunders. near the apex of Gold Hill mountain, where an enormous blowout is located on the south end of the Iowa group of on the south can of the low group of mining claims. The blowout is a de-pression on the hill at the head of lowa guich and is about 900 feet in circum-ference.

All classes of mixed mineralized rock

All classes of mixed mineralized rock can be found in this area, the principal rock being a black, shaley lime, with the surrounding formation an andesite porphyry. Large dykes of iron ore run through the blowout, and it is between the prophyry casing and the iron and black lime that the vein is found. The layer of quartz so far shown is from twenty to forty feet in width, and is thickly filled with white iron, which resembles sylvanite and when reasted a mineral resembling gold appears. The rock is streaked with quartz the same as the Wilson mesa, ribbon rock, but looks altogether different.

sitogether different.

Samples have been sent out to three different assayers to test the value of the ore. To be the same as the mesa rock it myst contain values of from \$54 to \$265 in gold and from 2 to 8 per cent copper. The Iowa rock so far does not show any signs of copper. In every other detail it has all the appearance of the mesa ore, The property is being opened up.

Word has been received from the Colorado contingent that they are prepared to closs all deals concerning the High Ore merger on Mineral mountain, and that arrangements will be made the coming winter for work on a large scale the coming summer. This is creating a mixup with adjoining claimants outside of the merger and there may be some litigation when the official survey is made and work started on the big development tunnel.

Another merger of Gold Hill property under consideration will include the lowa group. Tornado-Indiana group, the Basin Belle and Express, Aspen and Midland Belle properties. The Tornado property is worked now by the Tornado company, which is a Salt Lake syndicate, and some fine ore showing free gold, produced. The Aspen, Iowa and Midland Belle are also developed to a limited extent.

The Grouse Mountain company has arrangements now made for the building of its 100-ton cyanide plant. This makes three big development enterprises surrounding Miners' Basin, including the Mineral mountain tunnel which may be taken in by the High Ore syndicate as an outlet into Miners' Basin through Mineral mountain. m outlet into amountain.

Mineral mountain.

The Dirigo-La Sal company in Beaver Basin is coming this way through Pliot mountain on the east.

#### GLASMANN BUYS A MINE.

#### )gden's Mayor Reaching Out to Become a Millionaire.

Special to The Tribune.

Special to The Tribune.

CALJENTE, Nev., Sept. 23.—It is reported that Mayor William Glasmann of Ogdath has become interested in a group of gold-copper claims near Goode Springs, but to just what extent the suave chief executive of Salt Lake's suburb is "In" is as yet unknown.

Leo Sanders of Ogden is one of the owners of the group and is authority for the statement that Mayor Glasmann is putting up the long green for opening up the properties, which are among the most promising in the Goode Springs district.

Superintendent McNames of the Bam-

Superintendent McNamee of the Bamerger-De Lamar company passed through amp today, en route to Salt Lake.

Jack Bulmer, owner of the Three Deuces silver claim, forty-six miles west of Callentes obtained assays of 112 and 25 ounces silver from samples sent to Salt Lake last week Salt Lake last week

G. Hudson, one of the owners of the Black Hawk groups on Virgin river, sold fils one-fourth interest last week to Page & Goodsell of Denver for 1200. They have a 110-foot shaft and a 20-foot tunnel on a three-foot ledge of free gold ore. The average values are about \$20 per ton.

Morton & Ellis of New York have incorporated the Gold Eagle group of gold claims on Colorado river, for Tuliey and Lewis, owners, for \$1,000,000, and six miners will be put on development work on the groups October 1. They have a two and one-half-foot ledge of \$65 ore, carrying coarse free gold. They expect to make an early shipment of ore to Salt Lake as a test and to increase the sale of stock, the proceeds of which will be used to develop the properties.

Jack Harris and O. S. Brown, owners of the Black Hawk mine, about thirty miles from Meana report assays of \$25.50 gold and \$6 owners silver from samples sent to Sait Lake hast week.

Joseph Elliott, one of the owners of the California group of lead-silver claims, fitty miles northwest of Meana, went through camp today to Sait Lake with four sacks of rich ore running in horn silver and lead carbonnies, for assay.

Noble and Woodruff, half owners of the

Noble and Woodruf, half owners of the Silver Leaf group, thirty miles northwest of camp, struck a five-foot vein of grey copper ore in a 200-foot tunnel last week and espect to ship a quantity of this ore to Salt Lake as soon as possible. They say they have assays of 20 per cent copper and 150 ounces silver from this ledge, at the bottom of a thirty-foot shaft.

F. Wilton and Martin James, owners of the Grand Duke group, twenty-eight miles north of Arden, on the San Pedro road, are now sacking \$110 gold-sliver ore for shipment to Salt Lake. They have about 500 feet of work completed on claims and about 500 tens of ore blocked out ready to stope from a 300-foot funnel.

Leonard & Sharpe of Pueblo, owners of the Venus group of silver claims in Penn-sylvania district, brought several sacks of ore through today for shipment to Salt Lake for sampling. They have had assays of 240 ounces silver and 42 per cent lead, taken from a six-foot "pockety" lime de-posit on their claims. They have about 400 feet of work completed on the group

#### Increasing Development.

Increasing Development.

Miners in the Olingheuse district are greatly pleased with the prospects of the camp. In the last several weeks values higher than have heretofore been taken out were uncovered. Several of the companies will at once increase their work of development.

Ore taken from the Monitor shaft during lost week assayed \$233.59 in gold, silver and lead values per ton. It is expected that the tunnel new being run will cut this chute at 220 feet of depth.

Another chute of carbonate ore has been uncovered on the Macia. The chute, as disclosed, is about fifty feet from the scuth end line of the chain, and will no doubt be found to extend into the Despensa, as do the others heretofore discovered—Reno Gazette.

## Mining Notes.

Superintendent Murdock of the Hon-B. F. Lloyd has gone to his Copper mountain property in Beaver county. The Mammoth of Tintic had forty tons of \$100 gold ore on the market yesterday.

The Dexter of Tuscarora is now treating fallings from its plant and saving from \$3.50 to \$6.50 in gold and silver. William Ochs of Salt Lake is a director in the Gold Eagle Development company of Bolse, Ida, which has recently filed articles of incorporation.

A. J. Bettles of the Newhouse staff is confined to his home with a severe cold, contracted while on a recent visit East. It is reported that the Sunbeam Mining company, operating in Bismarck mountain, Custer county, Ideho, is taking out fifty tens of \$5 gold ore daily.

J. V. Brooks has gone to the Freiburg, Nev., district to inaugurate developments on the property of the Empire Mining company.

W. H. Nelson is said to have sold the Valentine group of claims at Fay, Nev., for \$100.

News of developments from the Pioche Newada Con. is of an encouraging nature, the ore on the eighty-foot level being re-ported as giving average values of 19 per cent lead and 10 ounces of sliver.

The Con Mercur has begun the opera-tion of the old Manning mill, by which it is expected to hundle the tailings at a small margin of profit.

The closing down of the Johnny mine and mill at Stateline has caused that camp to be simost deserted, says Lou East.
